**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In particular, claim 5 is indefinite because the language of "combining" does not provide a clear positive recitation of method steps. Also, it is not clear how this method step of "combining" provides a method of reinforcing synthetic fiber. Therefore, the metes and bounds for which patent protection is being sought are not clear.

Claim 6 is vague and indefinite because the composite material is not clearly defined. The language of "one or more other materials" does not provide a positive recitation of the structure or properties of the composite material. Therefore, the metes and bounds for which patent protection is being sought are not clear.

### ***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Merkel,

6,331,585 B1.

Art Unit: 1774

Merkel teaches a coating composition comprising a water-dispersible epoxy resin which is solid at 20 degrees C, wherein said epoxy resin does not comprise a reaction product of epichlorohydrin and either bisphenol A or bisphenol F, wherein the composition further comprises a water-dilutable epoxy resin hardener in the requisite amounts, per claims 1 and 2. In addition, Merkel teaches a method of coating wherein this composition can be applied to a surface, such as fiber glass, per claims 3 and 4. See abstract and column 1, lines 20-64 and Example 5. Therefore, it is the examiner's position that Merkel describes the claimed method and coated glass fiber within the meaning of 35 U.S.C. 102, and it is of no moment that Merkel does not exemplify such method and glass fiber per se. *In re Sivaramakrishnan*, 673 F.2d 1383, 1384-85, 213 USPQ 441, 442 (CCPA 1982). The teachings of Merkel provide a description of the claimed method and coated glass fiber just as surely as if the reference exemplified such method and glass fiber. Therefore, the teachings of Merkel anticipate the invention as claimed in present claims 1-4.

No claims are allowed.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
